

One complete solution to source, orchestrate, and deliver critical supplies.

Channels360 Supply Chain Edition combines the best technologies in supply chain operations, with InterSystems for connectivity and TesiSquare for fulfillment and delivery, all orchestrated through an intuitive platform that helps organisations reduce schedule disruption, improve readiness, and eliminate operational waste.

Best-in-class technologies brought together as one connected solution.

Channels360 Supply Chain Edition provides the orchestration layer that connects supply chain and operational data with fulfillment partners and delivery processes into one cohesive experience.

InterSystems Data Connectivity

Unify ERP, EHR, inventory, procurement, and operational data to create a trusted foundation for supply visibility and decision-making.

Smart Supply Chain Orchestration

Coordinate requests, automate workflows, manage exceptions, and give teams an intuitive interface to move from insight to action.

TesiSquare Fulfillment and Delivery

Drive efficient sourcing, fulfillment, and delivery so the right critical supplies arrive where and when they are needed.

A simple three-step model for supply chain readiness.

Channels360 Supply Chain Edition is designed to simplify complexity into one clear operational flow: connecting data, orchestrating action, and driving delivery execution.

1

Connect

Bring together ERP, line-of-business systems, inventory, procurement, and operational data through InterSystems to create a trusted supply chain foundation.

2

Orchestrate

Use Channels360 Supply Chain Edition to coordinate workflows, manage exceptions, and give teams an intuitive interface for action and visibility.

3

Deliver

Execute sourcing, fulfillment, and delivery through TesiSquare so critical supplies reach the point of use on time.

Proven expertise orchestrating complex supply chain ecosystems.

Supply chain integration expertise

Ready Computing has deep experience connecting complex supply chain ecosystems and operational platforms.

Orchestration-first approach

We specialise in orchestrating best-in-class technologies rather than forcing organisations into rigid monolithic systems.

Proven enterprise platforms

Channels360 Supply Chain Edition leverages trusted technologies like InterSystems and TesiSquare within a unified operational experience.

Built to simplify healthcare supply chain complexity.

Source with confidence

Use a connected data foundation to understand demand, inventory position, and supply status before disruption impacts operations.

Coordinate across teams

Align operational, procurement, and fulfillment stakeholders through shared workflows and role-based visibility.

Manage exceptions faster

Identify gaps early, route issues intelligently, and keep teams focused on resolving supply bottlenecks before commitments on the schedule are affected.

Deliver a complete experience

Bring data, workflow, fulfillment, and delivery together into a single solution rather than forcing users across multiple disconnected systems.

Best-in-class capabilities, visually connected.

Channels360 Supply Chain Edition sits at the center of the operating experience, connecting upstream supply chain and operational data with downstream fulfillment and delivery execution.

Data Layer

Orchestration Layer

Execution Layer

Reduce disruptions. Improve readiness. Eliminate waste.

When sourcing, inventory, fulfillment, and delivery live in separate systems, organisations face delays and inefficiencies. Channels360 Supply Chain Edition unifies these processes into one platform designed to keep operations moving.

Reduce schedule disruption caused by unavailable supplies

Lower waste from over-ordering, expiration, and manual rework

Improve supply readiness across sites, facilities, and service lines

Replace fragmented point solutions with one connected operational experience
